OBJECTIVE

Highly motivated concurrent Bachelor of Business Administration and Bachelor of Computer Science student with a passion for software development, data science and quantitative analysis. Possessing bilingual language skills in English and French, I am eager to learn and utilize my combined academic and professional skills.

EDUCATION

Bachelor of Business Administration (Co-op Program) <i>Wilfrid Laurier University</i>	Sept. 2022 – Present <i>Waterloo, ON</i>
Bachelor of Computer Science <i>University of Waterloo</i>	Sept. 2022 – Present <i>Waterloo, ON</i>

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, CSS, HTML, C++, C, LaTeX, SQL, Visual Basic
Developer Tools: Git, Google Cloud Platform, Azure DevOps, Visual Studio, Eclipse, Android Studio, Jupyter, Streamlit
Tools: Excel, Word, PowerPoint, Google Suite, Jira, Confluence, Tableau, Power BI, Canva, QuickBooks, Sage, Xero
Communication Tools: Microsoft Teams, Jabber, Webex, Slack
Spoken and Written Languages: English, French

PROJECTS

<u>Outbreak Management System</u> <i>Git, JavaScript, Python, Cloud Services</i>	Summer 2026
- Leveraged real data to create a dashboard overview of current outbreaks in Toronto - Workshopped the system directly with Toronto Public Health stakeholders across 5 sessions, running structured feedback loops on early builds and iterating on UX and core workflows	
Automated Cloud Budgeting Platform <i>Python, Git</i>	Fall 2025
- Created a budgeting platform that integrated with current cloud cost collection practices to allow users to seamlessly budget cloud costs for the next year - Provides users with a variety of automated forecasts based on trend analysis of current costs - Allows users to export data in various formats to easily integrate with budget keeping practices and analysis	
Integrated Case Competition - Semi Finalist <i>Excel, PowerPoint</i>	Spring 2025
- Researched, analyzed and presented consumer purchasing and foot traffic trends in the Waterloo Region - Strong quantitative analysis skills as showcased through statistical analysis & projection techniques to provide insight into current and future trends - Presented data surrounding the feasibility, viability, and desirability in a clear, concise, and accurate PowerPoint	
DataFest Hackathon - 2nd Place <i>Power BI, Excel</i>	Spring 2025
- Researched, planned and presented insights surrounding the United States commercial real estate market - Strong quantitative analysis skills as showcased through statistical analysis & projection techniques to provide insight into current and future trends - Researched, collected, analyzed, and summarized information and trends surrounding the commercial real estate market in the United States	
Valorant Data Analysis Project <i>Python, SQL, Power BI, Jupyter</i>	Spring 2025
- Designed an automated Python script to scrape match data from a website and organize it into databases - Analyzed and presented data for over 200 matches surrounding the current game metrics using Power BI - Created a new measurement statistic that holistically accounts for all player data - Deployed a Streamlit website to present data for over 200 matches surrounding the current game metrics - Designed and implemented a Python program that evaluates a Steam web page and displays relevant information such as price and item name - Used relevant libraries such as Beautiful Soup, pandas, Matplotlib, and seaborn to collect and visualize data	

- Used Object Oriented Programming techniques to help manage data and aid with code readability

Biquadris | *C++*

Spring 2024

- Built a text-based, two-player version of Tetris using C++
- Leveraged object oriented design patterns to code a readable & functional version of Tetris
- Experimented and iterated over additional features to add to the game such as new block types and different ways to "attack" the opposing player

Accounting Cycle Project | *BU 127 - Introduction to Financial Accounting*

Fall 2023

- Produced journal entries based on the given transaction history of a firm
- Learned how to read and understand the implications of financial statements
- Independently prepared T-accounts, an adjusted trial balance, a detailed statement of income, statement of owners equity, balance sheet and closing entries applying International Financial Reporting Standards (IFRS)
- Gained a strong understanding of IFRS accounting principles and practices, and enhanced Excel skills through the completion of this project

Probability | *STAT 230 - Probability*

Fall 2023

- Gained strong quantitative skills and knowledge of statistics through the completion of case assignments
- Leveraged analytical skills in completing quizzes on statistics

New Venture Competition Semi-Finalist | *BU 121 - Functional Areas*

Winter 2023

- Collaborated with a group of peers to show the feasibility, desirability and viability of a new venture idea and acted professionally and courteously throughout the project
- Strong mathematical and analytical skills that were used to forecast potential consumer demand and in the creation of a firm's budget that reflected the potential demand
- Used Excel to create financial forecasts based on estimates using research and collected data
- Excellent research skills shown through building a report demonstrating the viability, feasibility and desirability of the technology needed for our new venture idea
- Created a pitch deck showcasing data about the new venture idea while maintaining a consistent style that reflected the venture

CIIP Project | *BU 111 - Understanding the Business Environment*

Fall 2022

- Developed and presented a recommendation for a skin care brand based on consumer and market trends
- Created key performance indicators (KPI) for the recommendation for the firm to measure the success of the recommendation
- Developed risk and mitigation strategies to ensure the success of the implementation of the recommendation
- Analyzed business processes using SWOT analysis, Diamond E Framework and developed strategies to improve the business and/or mitigate challenges

Alpha Dogs Scouting App | *Java, Git, Android Studio*

Jan. 2022 – May. 2022

- Programmed an innovative app using Android Studio in Java that recorded real-time feedback about matches in the FIRST Robotics Competition and sent the data to a spreadsheet through Bluetooth to a master device
- Took initiative to learn new technologies to make a complete and comprehensive scouting app
- Quantitative analysis was performed to provide statistics to help with strategy and decision making
- Analytically and efficiently diagnosed problems with the app source code and debugged errors to deliver a high quality scouting app
- This was used by a scouting team made up of 10-15 students

Alpha Dogs Robot | *Java, Git*

Sept. 2018 – Jun. 2022

- Utilized Java to program robots that successfully accomplished tasks such as shooting a ball into a goal, climbing or hanging from bars which contributed to the team's qualification to the World Championships
- Ability to learn new technologies quickly as seen through the swift implementation of new libraries to allow the robot to sense colour
- Leveraged critical thinking through diagnosing problems with the robot source code and debugged errors to deliver high quality and efficient robot code

EXPERIENCE

Manager for Marvel Rivals E-Sports Operations

Sept. 2026 – Present

University of Waterloo Athletics Department

Waterloo, ON

- Designed and ran the tryout process, including a structured soft-skills rubric to standardize evaluation across multiple evaluators and reduce selection bias
- Test roster configurations systematically by holding variables constant across consecutive scrimms, isolating the effect of individual lineup and role changes on team performance

Business Analyst

May. 2026 - Aug. 2026

Royal Bank of Canada

Toronto, ON

- Analyzed large-scale marketing campaign datasets to assess campaign health, track performance trends, and identify areas for improvement
- Generated data-driven insights and reports to support strategic marketing decisions and improve campaigns
- Collaborated with stakeholders to communicate statistical findings, campaign results, and performance recommendations
- Provided actionable recommendations based on quantitative analysis to optimize marketing campaigns and support business objectives

Cloud FinOps (Co-op)

Sept. 2025 - Dec. 2025

Magnet Forensics

Waterloo, ON

- Built a custom cloud budgeting platform that generated cost forecasts, enabled user-driven edits, and supported budget exports to streamline financial planning
- Saved Magnet Forensics over \$300,000 in cloud costs annually by identifying, recommending and implementing cloud cost-optimization opportunities
- Developed and managed a \$14M cloud budget for FY26, including creation of budgeting frameworks and financial projections
- Collaborated and communicated regularly with major stakeholders to present budget updates, cloud spend insights, and cost-saving recommendations
- Refined FinOps workflows, such as weekly cost reviews and anomaly alerting processes

Audit Intern (Co-op)

Jan. 2025 - Apr. 2025

Norton McMullen Corporate Finance

Markham, ON

- Completed audits, from initial client engagement to filing taxes, for both not-for-profit and for-profit organizations
- Ensured audit work-papers were accurate and compliant by reconciling documents to the general ledger and investigating variances
- Conducted substantive testing and internal control procedures, inquired with clients, and documented conclusions in accordance with assurance standards
- Created and analyzed client financial statements to effectively present client financial data
- Developed situation specific Excel macros to help transfer client data from PDF to Excel sheets to perform analysis
- Experienced in using various accounting software such as QuickBooks, Sage and Xero, with knowledge of IFRS for both for-profit and not-for-profit organizations
- Superior time management, organizational, prioritization and multitasking skills were enhanced by managing multiple clients in a fast paced and dynamic environment
- Excellent written and verbal communication skills were strengthened through client communications throughout the audit process

Vice President of Finance

May. 2024 – Present

University of Waterloo Statistics Club

Waterloo, ON

- Developed and managed the club's budget throughout the semester
- Developed and implemented a comprehensive marketing plan that saw a 1100% boost in club engagement
- Coordinated with 4 sub-teams to ensure the completion of projects with competing deadlines from initiation to completion within budget, timeline, and scope
- Planned midterm and final study sessions, developed study materials and taught students course material
- Maintained and analyzed club financial records and inventory in compliance with assurance standards
- Completed a yearly financial audit and analysis to provide insight into club activities to help plan future events to maximize potential club revenues

- Superior time management, strong organizational, prioritization and multitasking skills were enhanced by managing multiple projects throughout the fast-paced and dynamic semester

Software Developer (Co-op)

Jan. 2024 – Apr. 2024

Connex Telecommunications

Markham, ON

- Worked with Contact Center Artificial Intelligence technologies, including Dialogflow CX and Nuance, in making AI agents to serve the clients' needs
- Developed and designed a pipeline using Azure Pipelines to streamline the process of uploading code to Cloud Run
- Used RESTful API (Node.js) to resolve any back-end issues with the chatbots
- Developed testing websites using HTML and CSS for shareholders to test and interact with developed chatbots
- Efficiently researched and planned the implementation for back-end encryption and decryption of user data
- Applied the Software Development Life Cycle (SDLC) by participating in planning, development, testing, deployment, and maintenance phases to deliver AI-powered chatbot solutions efficiently and with high quality
- Made recommendations to address gaps within current programs and implemented these recommendations
- Detail oriented, analytical and logical, showcased through the thorough testing and debugging of both the front end and the back end of multiple AI powered chatbots
- Self-motivated and quick learner shown through learning multiple different Contact Center Artificial Intelligence technologies quickly and performed in a fast-paced, entrepreneurial environment
- Superior time management, strong organizational, prioritization and multitasking skills were enhanced by managing multiple projects throughout the fast-paced and entrepreneurial environment

Programming Lead

Sept. 2018 – Jun. 2022

Alpha Dogs FIRST Robotics Team

Bolton, ON

- Exceptional leadership, conflict resolution, coaching and mentoring skills developed through leading a team of 15 members in programming a robot
- Planned, developed and implemented a comprehensive Java programming training on object-oriented programming and data structures for high school students on the robotics team
- Led programming team meetings to provide project updates, feedback and planned team workflows to ensure a completed robot at the end of the build season
- Motivated and coached students in learning and developing new skills leading to the implementation of technology that allows students to easily program autonomous paths
- Utilized strong oral and written communication skills to develop sponsorship presentations and reports to firms such as Canadian Tire and Husky with a 100% success rate in securing funds
- Developed, coordinated and managed an outreach program giving students the opportunity to learn basic STEM skills through delivering a lecture for a robotics convention
- Analyzed, reported and presented detailed scouting data for over 200 matches each year providing recommended decisions based on the analysis
- Provided strategy decisions for competitions based on the analysis of data for over 200 matches along with solid judgment and intuition
- Worked cross-functionally across teams to ensure that robot programming matched designs
- Showcased exceptional flexibility, creativity, and initiative while collaborating with different sub teams, such as the business sub team with monthly progress reports, to ensure all tasks are completed in a timely manner
- Strong customer service skills developed through correspondence with sponsors and community members
- Understanding of robotics, control systems and machine operation
- Showcased a positive attitude and strong work ethic, often spending over 40 hours a week to ensure that projects were completed from initiation to completion within approved time, budget, scope and quality
- Result-focused, with a drive to produce high quality work shown through the team's consistent placement within the top 20 FIRST Robotics Teams in Canada
- Superior time management, strong organizational, prioritization and multitasking skills were enhanced by managing multiple projects throughout the fast-paced and challenging robotics season

Vice President

Sept. 2018 – Jun. 2022

Music Activity Council

Bolton, ON

- Planned, organized, and managed a music competition project from initiation to completion within budget, timelines, scope and resources
- Participated, contributed, and created events for and initiatives to support the music community
- Supported the development of an equitable, diverse and inclusive community
